

# Flow Switch Plus

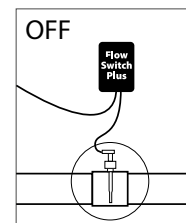

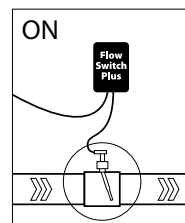

The Flow Switch Plus is the ideal protection for a UV-C disinfection system in your pool installation. It will turn off the lamp at insufficient water flow.

## Advantages of the Blue Lagoon Flow Switch Plus

- Prevents systems from running without flow
- Easy installation thanks to the compact design
- Easy to combine
- Also suitable for salt-water systems

## Operation

The Flow Switch Plus is the ideal protection for an electrical device in your pool installation, such as a UV-C device or other device rated at up to 10 amps, for which it is desirable that it is switched off once the water flow stops. Thanks to the compact design, the Flow Switch Plus is very easy to install. Using the special tee fitting, the flow switch can be easily integrated into your new or existing piping.
