

# ProfiHeater 3kW

The Blue Lagoon ProfiHeater is very suitable for warming up water. The heater is very easy to install in and around filter installations and applicable for various pools.

## Advantages of the Blue Lagoon ProfiHeater

- Built-in heating element with thermostat
- 316L stainless steel body
- Universal fittings included
- Made in the Netherlands

## Operation

The ProfiHeater can be used for warming up your swimming pool water. The ProfiHeater is equipped with an adjustable thermostat. Both the heating element with temperature sensor and the interior of the casing are manufactured from high-quality 316L stainless steel. The ProfiHeater can be connected using a flexible hose (Ø25, 32 and 40 mm) or PVC tubing (Ø50 and 63 mm). The ProfiHeater is available in 3kW. Max. pressure: 2 bar. It is advised to use a Flow Switch Plus to prevent overheating of the unit at insufficient water flow.

## Technical specifications
