

SUBMERSIBLE ELECTRIC WATER PUMPS FOR DOMESTIC AND INDUSTRIAL USE

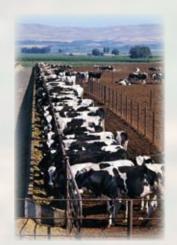

Introduction

Company profile

CITY PUMPS is the latest breakthrough from INOX POMPE. The company has undergone a restyling with a European brand image and an international repute in the manufacture of electric water pumps for civilian, agricultural and industrial applications.

The productive standards implement all the electric and hydraulic inspections prescribed by the EU safety regulations and use productive plants that are among the technologically most advanced in the electro technical and mechanical industry.

We export to over 50 countries.

CITY PUMPS works in conjunction with leading international groups in the research and production of civilian and industrial electric water pumps.

a wide range of...

Performances of City Pumps' submersible range of water pumps

City Pumps offers a wide range of electric water pumps for domestic, civilian and industrial applications.

Its range of products meets the requirements of an efficient product, simple to use, flexible and with low power consumption.

...electric water pumps...

| | ı | | Manual V | |
|--------------|----------|---|--|---------|
| | Products | Range of performance | Applications | Page |
| SPEED PLURI | | Flow rate up to 100 l/min (6 m³/h) Head up to 42 m | They are recommended for pumping clean water with a sand content no higher than 50 g/m³. Their high efficiency and reliability makes them suitable for supplying domestic water from tanks, reservoirs or relatively deep wells, drawing rainwater from cisterns, watering by hand or feeding. | Page 10 |
| SPEED | | Flow rate up to 400 l/min (24 m³/h) Head up to 14.5 m | The SPEED series is suitable for draining clear water without abrasive particles. The construction guarantees simple and safe operation due to the complete cooling of the motor by the pumped water and the double seal design. They are recommended for emergency draining of small flooded areas (rooms, cellars, garages), for the disposal of waste water in the home (dishwasher, washing machine) and for emptying drainage traps. | Page 12 |
| SPEED MOP | CIT | Flow rate up to 220 l/min (13.2 m³/h) Head up to 9 m | The SPEED MOP series is suitable for draining clear water without abrasive particles. Their ability to drain water down to 2 millimetres from the floor makes them ideal for emergency domestic use of small flooded areas and in all those applications where maximum drainage is required. | Page 14 |
| SPEED VORTEX | | Flow rate up to 180 l/min (10.8 m³/h) Head up to 7 m | The SPEED VORTEX pump is suitable for draining dirty water that is chemically non aggressive. The construction guarantees simple and safe operation due to the complete cooling of the motor by the pumped water and the double seal design. It is recommended for domestic use, for the clearing of dirty water, for emptying tanks, domestic drains and collection traps, even with suspended solid bodies with dimensions up to Ø 20 mm. | Page 16 |
| Ε | ur ecc. | Flow rate up to 300 l/min (18 m³/h) Head up to 23 m | F1 pumps are suitable for draining clear water without abrasive particles. The construction guarantees simple and safe operation due to the complete cooling of the motor by the pumped water, and the double seal design. They are recommended for fixed installations, emergency draining of small flooded areas (basement rooms, cellars, garages), for disposal of dirty water used in the home by washing machines and dishwashers and for draining collection traps. | Page 18 |

...for any requirement

| | | _ | | |
|-----------|----------|---|---|---------|
| | Products | Range of performance | Applications | Page |
| F1 VORTEX | | Flow rate up to 450 l/min (27 m³/h) Head up to 14.5 m | F1 VORTEX pumps are suitable for draining dirty water. The construction guarantees simple and safe operation, due to the complete cooling of the motor by the pumped water. They are recommended for domestic use, for draining dirty water containing suspended solids. | Page 20 |
| DRENO | chr | Flow rate up to 300 l/min (18 m³/h) Head up to 14 m | Designed for draining clear or slightly dirty water, they are suitable for domestic use, for draining flooded areas such as cellars and for emptying tanks and reservoirs; they are outstanding in both their simplicity of installation and their reliability in fixed installations with automatic operation. | Page 22 |
| COBRA | | Flow rate up to 300 l/min (18 m³/h) Head up to 10 m | COBRA pumps are recommended for draining waste water in the domestic sector, for clearing dirty water, even containing suspended solid bodies with dimensions up to ø 40 mm. They are outstanding in both their simplicity of installation and their reliability in fixed installations with automatic operation. | Page 24 |
| SECURITY | | Flow rate up to 400 l/min (24 m³/h) Head up to 27 m | Designed for draining clear or slightly dirty water with small solids, they are recommended for domestic, civil and professional use, for draining flooded areas such as cellars and garages or for emptying swimming pools or tanks and for disposing of non-sewage waste water. These pumps are outstanding in their reliability in fixed installations with automatic operation. | Page 26 |
| RANGER | | Flow rate up to 500 l/min (30 m³/h) Head up to 15 m | They are recommended for domestic, civil and industrial use, in applications where the water contains suspended solids with dimensions up to ø 50 mm. Their use is recommended for drying flooded areas such as cellars, underground car parks, car washing areas, or domestic drains and for emptying cesspits or sewage disposal. These pumps are outstanding in their reliability in fixed installations with automatic operation. | Page 28 |

a complete line of electric water pumps...

| | Products | Dange of newformance | Applications | Dago |
|--------------|--|---|--|---------|
| | Products | Range of performance | Applications | Page |
| RANGER MC | City | Flow rate up to 800 l/min (48 m³/h) Head up to 15 m | RANGER MC submersible pumps are recommended for draining dirty water and sewage in the domestic and civil sectors. They are equipped with a DOUBLE-CHANNEL stainless steel impeller which allows the pumping of liquids containing suspended solid bodies with dimensions up to ø 50 mm and short fibres. They are ideal for pumping drainage water, sewage or waste water for a single dwelling, and for clearing suface or nuisance water, even if muddy. These pumps are outstanding in their reliability in fixed installations with automatic operation. | Page 30 |
| RANGER SS | SUP | Flow rate up to 400 l/min (24 m³/h) Head up to 10 m | They are recommended for draining waste water in the domestic, civil and industrial sectors, in applications where the water contains suspended solids with dimensions up to Ø 50 mm. Their use is recommended for drying flooded areas such as cellars, underground car parks, car washing areas and for emptying cesspits or sewage disposal. These pumps are outstanding in their reliability in fixed installations with automatic operation. | Page 32 |
| RANGER MC SS | | Flow rate up to 800 l/min (48 m³/h) Head up to 15 m | RANGER MC SS submersible pumps are recommended for draining dirty water and sewage in the domestic and civil sectors. They are equipped with a DOUBLE-CHANNEL stainless steel impeller which allows the pumping of liquids containing suspended solid bodies with dimensions up to Ø 50 mm and short fibres. They are ideal for pumping drainage water, sewage or waste water for a single dwelling, and for clearing surface or nuisance water, even if muddy. These pumps are outstanding in their reliability in fixed installations with automatic operation. | Page 34 |
| SECURITY G | Canalina Can | Flow rate up to 400 l/min (24 m³/h) Head up to 27 m | SECURITY G submersible pumps, made of exceptionally sturdy heavy-gauge cast iron, resistant to abrasion and long-lasting, are recommended for draining clear or slightly dirty water and for disposing of non-sewage waste water; they are outstanding both in their sturdiness and their reliability in fixed installations with automatic operation. | Page 36 |
| TITAN 35-45 | | Flow rate up to 500 l/min (30 m³/h) Head up to 15 m | The pumps in the TITAN series are made of exceptionally robust heavy-gauge cast iron, resistant to abrasion and are equipped with a vortex type impeller. They are recommended for draining waste water containing suspended solid bodies, sewage and water mixed with mud. | Page 38 |

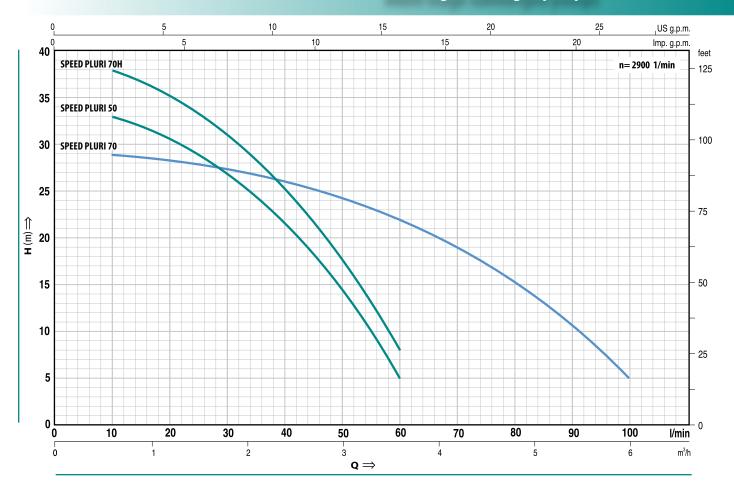

...to satisfy any requirement

| | Products | Range of performance | Applications | Page |
|--------------|----------|--|---|---------|
| PATROL 45 | | Flow rate up to 800 l/min (48 m³/h) Head up to 15 m | The pumps in the PATROL series are made of exceptionally robust heavy-gauge cast iron, resistant to abrasion and long-lasting. They are equipped with a double-channel impeller which allows the drainage of liquids containing suspended solid bodies with dimensions up to Ø 45 mm and short fibres. They are ideal for pumping drainage water and sewage, waste water including water mixed with mud, groundwater and surface water in applications such as: condominiums, multi-storey and underground car parks, washing areas and industry. | Page 40 |
| TITAN 50-70 | | Flow rate up to 1200 l/min (72 m³/h) Head up to 16 m | TITAN series pumps are made of exceptionally robust heavy-gauge cast iron, resistant to abrasion and long-lasting, and have a vortex type impeller. They are suitable for sewage, waste water and sludge, including water containing solids or mud. They are ideal for sewage installation, tunnels and other excavations, underground car parks and similar applications. | Page 42 |
| PATROL 50-70 | | Flow rate up to 1600 l/min (96 m³/h) Head up to 24 m | PATROL series pumps are made of exceptionally robust heavy gauge cast iron, abrasion resistant and long-lasting, with a single-channel impeller which can handle liquids with suspended solids and short fibres. They are ideal for sewage, waste and ground water, even with solids or mud, and are therefore recommended for building or industrial effluent and drainage of large areas such as car parks. | Page 44 |
| TITAN P | | Flow rate up to 1200 l/min (72 m³/h) Head up to 16 m | TITAN P series pumps are made of exceptionally robust heavy gauge cast iron, resistant to abrasion and long lasting, and have a vortex type impeller. They are suitable for sewage, waste water and sludge, including water containing solids or mud. They are ideal for fixed sewage installations, tunnels, underground carparks, sumps and similar applications. | Page 46 |
| PATROL P | | Flow rate up to 1600 l/min (96 m³/h) Head up to 24 m | PATROL P series pumps are made of exceptionally robust heavy gauge cast iron, abrasion resistant and long-lasting, with a single-channel impeller which can handle liquids with suspended solids and short fibres. They are ideal for sewage, waste and ground water, even with solids or mud, and are therefore recommended for building or industrial effluent and drainage of large areas such as car parks. | Page 48 |

RANGE OF PERFORMANCE Flow rate up to 100 l/min (6 m³/h) Head up to 42 m

LIMITS OF USE Submersion depth up to 10 m Liquid temperature up to + 40°C Maximum sand content 50 g/m³ Emptying level up to 30 mm from the bottom

INSTALLATION AND USE

THEY ARE RECOMMENDED FOR PUMPING CLEAN WATER WITH A SAND CONTENT NO HIGHER THAN 50 g/m³.

THEIR HIGH EFFICIENCY AND RELIABILITY MAKES THEM SUITABLE FOR SUPPLYING DO-MESTIC WATER FROM TANKS, RESERVOIRS OR **RELATIVELY DEEP WELLS, DRAWING RAINWA-**TER FROM CISTERNS, WATERING BY HAND OR FEEDING.

GUARANTEE 2 YEARS subject to our general terms of sale.

CONSTRUCTION CHARACTERISTICS

- DELIVERY BODY AND SUCTION GRID: glass filled **technopolymer**, particularly resistant to impact and corrosion, with threaded port ISO 228/1.
- IMPELLERS and DIFFUSERS: technopolymer.
- DIFFUSER CONTAINER: stainless steel AISI 304.
- **MOTOR SUPPORT:** stainless steel AISI 304.
- MOTOR SHAFT: stainless steel EN 10088-3 - 1.4104.
- **DOUBLE SEAL:** mechanical seal ceramic -silicon carbide-NBR, with oil barrier chamber and inner lip seal to protect the seal in the event of dry running.
- MOTOR: asynchronous, for continuous duty. **SPEED PLURI M:** single-phase 220÷240 V - 50 Hz with capacitor and thermal overload protector.
- INSULATION: class F. • PROTECTION: IP 68.

STANDARD FEATURES:

- Float switch Neoprene power cable "H05 RN-F"
- length 10 metres with Schuko plug
- Hosetail.
- Coupling with non-return valve.

OPTIONS ON REQUEST

⇒ other voltages or frequency 60 Hz

RANGE OF PERFORMANCE Flow rate up to 400 l/min (24 m³/h) Head up to 14.5 m

LIMITS OF USE

Depth up to 5 metres (3 metres up to 0.55 kW) Liquid temperature up to + 40°C

(+90°C for a maximum period of 3 minutes)

Passage of solid bodies up to Ø 10 mm Drainage level:

14 mm from the bottom for SPEED 30-50-70M 30 mm from the bottom for SPEED 100-125M

INSTALLATION AND USE

THE SPEED SERIES IS SUITABLE FOR DRAINING CLEAR WATER WITHOUT ABRASIVE PARTICLES. THE CONSTRUCTION GUARANTEES SIMPLE AND SAFE OPERATION DUE TO THE COMPLETE COOLING OF THE MOTOR BY THE PUMPED WATER AND THE DOUBLE SEAL DESIGN. THEY ARE RECOMMENDED FOR EMERGENCY DRAINING OF SMALL FLOODED AREAS (ROOMS, CELLARS, GARAGES), FOR THE DISPOSAL OF WASTE WATER IN THE HOME (DISHWASHER, WASHING MACHINE) AND FOR EMPTYING DRAINAGE TRAPS.

GUARANTEE 2 YEARS subject to our general terms of sale.

CONSTRUCTION CHARACTERISTICS

• DELIVERY BODY: glass filled technopolymer,

particularly resistant to impact and corrosion, with threaded port ISO 228/1.

- SUCTION GRID: technopolymer.
- IMPELLER: open type in technopolymer.
- MOTOR SUPPORT: stainless steel AISI 304.
- MOTOR SHAFT:

stainless steel EN 10088-3 - 1.4104.

• DOUBLE SEAL:

mechanical seal ceramic -graphite - NBR, with oil barrier chamber and inner lip seal to protect the seal in the event of dry running.

• MOTOR: submersible asynchronous single-phase for continuous duty.

SPEED M: single-phase 220÷240 V - 50 Hz with capacitor and thermal overload protector built into the winding.

- INSULATION: class F.
- PROTECTION: IP 68.

STANDARD FEATURES:

SPEED 30-50-70 M(single-phase)

- Float switch.
- · Hosetail.
- Power cable in neoprene "H05RN-F" length 5 metres with Schuko plug.

SPEED 100-125 M (single-phase)

- Float switch.
- · Hosetail.
- Coupling with flap valve.
- Neoprene power cable "H05 RN-F" length 10 metres with Schuko plug.

OPTIONS ON REQUEST

⇒ pumps for aggressive liquids **SPEED - AF**

- \Rightarrow special mechanical seal
- ⇒ 10 metres power cable. N.B. required for outdoor use to comply with standard EN 60335-2-41

LIMITS OF USE Depth up to 10 m Liquid temperature up to + 50°C

Liquid temperature up to $+60^{\circ}$ C for intermittent duty. Liquid temperature up to $+90^{\circ}$ C for intermittent duty maximum 3 minutes.

Passage of solid bodies up to Ø 10 mm **Drainage level:**

14 mm from the bottom for F1 1-2 30 mm from the bottom for F1 3-4-5

INSTALLATION AND USE

F1 PUMPS ARE SUITABLE FOR DRAINING CLEAR WATER WITHOUT ABRASIVE PARTICLES. THE **CONSTRUCTION GUARANTEES SIMPLE AND** SAFE OPERATION DUE TO THE COMPLETE **COOLING OF THE MOTOR BY THE PUMPED** WATER, AND THE DOUBLE SEAL DESIGN. THEY ARE RECOMMENDED FOR FIXED INSTALLATIONS, **EMERGENCY DRAINING OF SMALL FLOODED** AREAS (BASEMENT ROOMS, CELLARS, GARAGES), FOR DISPOSAL OF DIRTY WATER USED IN THE HOME BY WASHING MACHINES AND DISHWASHERS AND FOR DRAINING COLLECTION TRAPS.

GUARANTEE 2 YEARS subject to our general terms of sale.

CONSTRUCTION CHARACTERISTICS

- DELIVERY BODY: stainless steel AISI 304, with threaded port ISO 228/1.
- SUCTION GRID: stainless steel AISI 304.
- IMPELLER: stainless steel AISI 304.
- MOTOR SUPPORT: stainless steel AISI 304.
- MOTOR SHAFT:

stainless steel EN 10088-3 - 1.4104.

· DOUBLE SEAL: mechanical seal ceramic - graphite - NBR, with oil barrier chamber and inner lip seal to protect the seal in the event of dry running.

· MOTOR: submersible asynchronous single-phase for continuous duty.

F1 M: single-phase 220 ÷240 V - 50 Hz with capacitor and thermal overload protector.

F1: three-phase 380÷415 V - 50 Hz.

• INSULATION: class F. • PROTECTION: IP 68.

STANDARD FEATURES:

F1 M (single-phase)

- · float switch.
- Neoprene power cable "H05 RN-F"
- length 5 metres with Schuko plug.

F1 (three-phase)

• Neoprene power cable "H05 RN-F" length 5 metres.

OPTIONS ON REQUEST

- \Rightarrow special mechanical seal
- ⇒ 10 metres power cable. N.B. required for outdoor

use to comply with standard EN 60335-2-41

- ⇒ control box for three-phase electropumps 1.1 kW
- ⇒ single-phase versions without float switch
- ⇒ other voltages or frequency 60 Hz

LIMITS OF USE Depth up to 5 m Liquid temperature up to + 40°C Passage of suspended solid bodies up to Ø 50 mm

For continuous duty: minimum immer-

sion 290 mm from pump base

INSTALLATION AND USE

THEY ARE RECOMMENDED FOR DOMESTIC. **CIVIL AND INDUSTRIAL USE, IN APPLICATIONS** WHERE THE WATER CONTAINS SUSPENDED SOLIDS WITH DIMENSIONS UP TO Ø 50 mm. THEIR USE IS RECOMMENDED FOR DRYING FLOODED AREAS SUCH AS CELLARS, UN-DERGROUND CAR PARKS, CAR WASHING AREAS, OR DOMESTIC DRAINS AND FOR EMPTYING CESSPITS OR SEWAGE DISPOSAL. THESE PUMPS ARE OUTSTANDING IN THEIR RELIABILITY IN FIXED INSTALLATIONS WITH **AUTOMATIC OPERATION.**

GUARANTEE 2 YEARS: subject to our general terms of sale.

CONSTRUCTION CHARACTERISTICS

- DELIVERY BODY:
- cast iron, with threaded port ISO 228/1.
- MOTOR CASING: stainless steel AISI 304.
- BASE: stainless steel AISI 304.
- IMPELLER: stainless steel AISI 304.
- MOTOR SHAFT:
 - stainless steel EN 10088-3 1.4104.
- DOUBLE SEAL:

mechanical seal silicon carbide-ceramic-NBR. with oil barrier chamber and inner lip seal to protect the seal in the event of dry running.

MOTOR: submersible asynchronous for continu-

RANGER M: single-phase 220÷240 V - 50 Hz with capacitor and thermal overload protector.

RANGER: three-phase 380÷415 V - 50 Hz.

- INSULATION: class F.
- PROTECTION: IP 68.

STANDARD FEATURES:

RANGER M (single-phase)

- · Float switch.
- Neoprene power cable "H07 RN-F" length 5 metres with Schuko plug.

RANGER (three-phase)

• Neoprene power cable "HO7 RN-F" length 5 metres.

OPTIONS ON REQUEST

⇒ 10 metres power cable. N.B. required for outdoor use to comply to standard EN 60335-2-41

- ⇒ control panel for three-phase pumps 1.1 kW
- ⇒ single-phase pumps without float switch
- ⇒ other voltages or frequency 60 Hz

RANGE OF PERFORMANCE Flow rate up to 500 l/min (30 m³/h) Head up to 15 m

LIMITS OF USE
Depth up to 10 m
Liquid temperature up to + 40°C
Passage of solid bodies max Ø 35 mm for
TITAN/35

Passage of solid bodies max Ø 45 mm for TITAN/45

For continuous duty: minimum immersion 290 mm from pump base

INSTALLATION AND USE

THE PUMPS IN THE TITAN SERIES ARE MADE OF EXCEPTIONALLY ROBUST HEAVY-GAUGE CAST IRON, RESISTANT TO ABRASION AND ARE EQUIPPED WITH A VORTEX TYPE IMPELLER. THEY ARE RECOMMENDED FOR DRAINING WASTE WATER CONTAINING SUSPENDED SOLID BODIES, SEWAGE AND WATER MIXED WITH MUD.

GUARANTEE 2 YEARS subject to our general terms of sale.

CONSTRUCTION CHARACTERISTICS

• PUMP BODY: cast iron, with threaded port ISO 228/1.

- MOTOR CASING AND BASE: cast iron.
- IMPELLER:

vortex in stainless steel AISI 304.

MOTOR SHAFT:

stainless steel EN 10088-3 - 1.4104.

• DOUBLE SEAL:

mechanical seal **silicon carbide-ceramic-NBR**, with oil barrier chamber and inner lip seal to protect the seal in the event of dry running.

MOTOR: submersible asynchronous for continuous duty.

TITAN M: single-phase 220÷240 V - 50 Hz with thermal overload protector.

TITAN: three-phase 380÷415 V - 50 Hz.

- INSULATION: class F.
- PROTECTION: IP 68.

TITAN M (single-phase)

- · Float switch.
- Neoprene power cable "H07 RN-F" length 10 metres with Schuko plug.
- Control box with capacitor (Protection IP 64). **TITAN** (three-phase)
- Neoprene power cable "H07 RN-F" length 10 metres.

OPTIONS ON REQUEST

- ⇒ control box for three-phase pumps 1.1 kW
- \Longrightarrow single-phase pumps without float switch
- ⇒ other voltages or frequency 60 Hz

RANGE OF PERFORMANCE Flow rate up to 1200 l/min (72 m³/h) Head up to 16 m

LIMITS OF USE
Depth up to 10 m
Liquid temperature up to + 40°C
Passage of solid bodies max Ø 50 mm for
TITAN 15-20-30/50 P
Passage of solid bodies max Ø 70 mm for
TITAN 15-20-30/70 P
For continuous duty: minimum immersion 430 mm from pump base

INSTALLATION AND USE

TITAN P SERIES PUMPS ARE MADE OF EXCEPTION-ALLY ROBUST HEAVY GAUGE CAST IRON, RESIST-ANTTO ABRASION AND LONG LASTING, AND HAVE A VORTEX TYPE IMPELLER. THEY ARE SUITABLE FOR SEWAGE, WASTE WATER AND SLUDGE, IN-CLUDING WATER CONTAINING SOLIDS OR MUD. THEY ARE IDEAL FOR FIXED SEWAGE INSTALLA-TIONS, TUNNELS, UNDERGROUND CARPARKS, SUMPS AND SIMILAR APPLICATIONS.

GUARANTEE 2 YEARS subject to our general terms of sale.

CONSTRUCTION CHARACTERISTICS

- PUMP BODY, MOTOR CASING AND BASE PED-ESTAL: cast iron.
- IMPELLER: vortex in cast iron.
- BASE: stainless steel AISI 304.

MOTOR SHAFT:

stainless steel EN 10088-3 - 1.4057.

DOUBLE SEAL:

mechanical seal silicon **carbide** - **widia** - **NBR**, with oil barrier chamber and inner lip seal to protect the seal in the event of dry running.

• MOTOR: submersible asynchronous, 2 pole, for continuous duty.

TITAN P M: single-phase 220÷240 V - 50 Hz Models up to 1.5 kW have built in thermal protection. 2.2 kW single-phase versions have a thermal protector provided in the winding for connection to the control box.

TITAN P: three-phase 380÷415 V - 50 Hz. Thermal protectors are provided in the winding for connection to the external control panel

- INSULATION: class F.
- PROTECTION: IP 68.

STANDARD FEATURES:

- Base pedestal elbow (duct foot)
- Threaded delivery counterflange
- Top supports for guide tubes

TITAN P M (single-phase)

- Float switch.
- **10m** "H07 RN-F" submersible power cable with Schuko plug.
- 1.1 to 1.5 kW models are supplied with control box with capacitor and manual reset motor protector.
 2.2 kW models are supplied with control box type QES 300 MONO.

TITAN P (three-phase)

• 10m "H07 RN-F" neoprene power cable

OPTIONS ON REQUEST

- ⇒ control box for three-phase pumps
- \Rightarrow dual voltage: 230/400 V or 400/690 V
- \Rightarrow single-phase versions without float switch
- ⇒ other voltages or frequency 60 Hz

INSTALLATION AND USE

PATROL P SERIES PUMPS ARE MADE OF EXCEPTIONALLY ROBUST HEAVY GAUGE CAST IRON, ABRASION RESISTANT AND LONG-LASTING, WITH A SINGLE-CHANNEL IMPELLER WHICH CAN HANDLE LIQUIDS WITH SUSPENDED SOLIDS AND SHORT FIBRES. THEY ARE IDEAL FOR SEWAGE, WASTE AND GROUND WATER, EVEN WITH SOLIDS OR MUD, AND ARE THEREFORE RECOMMENDED FOR BUILDING OR INDUSTRIAL EFFLUENT AND DRAINAGE OF LARGE AREAS SUCH AS CAR PARKS.

GUARANTEE 2 YEARS subject to our general terms of sale.
