

Bareshaft Blowers

S2H Two Lobe Series

S2H Series Blowers

Range

Range of positive displacement blowers featuring two lobes for use in compression and vacuum for air or neutral gases.

Pressure up to 1 bar (14.5 psig) – Vacuum up to 540 mbar (16 "Hg)

S2H Series flow range by model:

S2H 22 to S2H 52 (BSP), S2H 22N to S2H 53N (NPT)
From 15 m³/h (9 cfm) to 1590 m³/h (935 cfm)

Experience and know how

With almost a century of experience in the manufacture and the sale of rotary positive displacement blowers, Ingersoll Rand has a large range of two-lobe blowers specially designed to meet the demanding requirements of standard air or neutral gas applications: efficiency, competitiveness, and robustness.

This know-how ensures that the entire range of standard blowers benefits from the largest technological developments, allowing the user to obtain an optimum solution best suited to his needs..

Benefits

- High mechanical and volumetric efficiency
- Reliability in operation
- Air cooled, oil free operation
- Fast and easy maintenance
- Dynamically balanced impellers
- Detachable feet allow for vertical or horizontal flow
- Clockwise or counter-clockwise rotation
- Direct drive or V-belt drive available throughout the operating range

Application

Thousands of international installations of Ingersoll Rand blowers are proof of their reliability and strength, providing universal solutions in wide-ranging applications such as:

- Water treatment
- Pneumatic conveying
- Combustion Air
- Centralized Cleaning
- Fluidization
- Homogenization
- Gas Compression

Performance

S2H22 to S2H53

Model	Maximum Inlet Flow		Max. Differential pressure		Max. Vacuum	
	m ³ /h	cfm	mbar	psig	mbar	"Hg

S2H53	1590	935	500	7	470	14

S2H22 to S2H53

Features

Casing: Close grained cast iron. Ribbed for strength.

Head-plates: Close grained cast iron. Machined for accurate bearing location and impeller alignment.

Rotors: Cast iron with pressed-in steel shafts.

Gears: Ground and hardened alloy steel spur gears.

Bearings: Anti-friction bearings, retained at gear end to allow accurate setting of gear end clearance between head-plate and impellers.

Lubrication: Oil splash lubricated at gear end. Grease lubricated at drive end.

Seals: Single lip seals for air blowers and exhausters. For gas boosting, special seals are used.

Motor start: Direct on-line preferred. Star Delta starting possible providing that the machine is unloaded on start-up.

Design

Part	European Designation	ASTM
Blower Body	EN GJL 200	A 48 gr 30 B
End covers	EN GJL 200	A 48 gr 30 B
Rotors	EN GJL 200	A 48 gr 30 B
Shafts	EN 10083-1-91/50CR V4	
Gears	CARBON STEEL 817 M 40	

Part Descriptions

S2H22 to S2H52 / S2H22N to S2H53N

1. Gear cover
 2. Oil filler plug
 - 3&9 Inlet/outlet
 4. Body casting
 5. Bearing greasing points
 6. Drive shaft
 7. Bearing cover
 8. Mounting feet
 10. Oil drain feet
 11. Oil level sight-glass
 12. External vent filter
 13. Gear cover vent port
- A** = Gear vent configuration
B = Alternative gear cover vent configuration

Ingersoll Rand Industrial Technologies provides products, services and solutions that enhance our customers' energy efficiency, productivity and operations. Our diverse and innovative products range from complete compressed air systems, tools and pumps to material and fluid handling systems and environmentally friendly microturbines. We also enhance productivity through solutions created by Club Car®, the global leader in golf and utility vehicles for businesses and individuals.
